

Kylie® Bed Pads (Kylie® Sheets)

The best selling washable bed pads in the UK!

To fit beds from a toddler size to King Size

Available in Pink or Blue

Kylie® is the original washable absorbent bed pad. It's so popular that often people use the name "Kylie® sheets" and term "Washable bed pad" interchangeably. Kylie® Sheets and Kylie® Bed Pads are the same thing and refer to washable absorbent bed pads.

But not all washable absorbent bed pads are the same. The Kylie® bed pad is unique in the way that it's made. The intention is to move moisture away from the skin as quickly as possible, and not to let the moisture stay against the skin.

Skin that is in close contact with urine can degrade, causing rashes and infections. Kylie® Bed Pads draw the moisture deep inside and don't let it stay on the skin. This will mean the user has a good undisturbed night of sleep, and in the morning, the pad can be removed and laundered without laundering the rest of the bed sheets.

Why Use a Kylie®?

Having a Kylie® on the bed will reduce time in stripping the bed off and washing the sheets. The pad has tuck in flaps to keep it in place on the mattress. For users that are likely to wet the bed every night, you can use the Kylie pad right on top of the sheet. For people that have a wet bed less often, you can place the Kylie® pad under the sheet.

Kylie® Pads For Bedwetting

Kylie® washable absorbent bed sheets are often a better choice than body worn products (nappies or pull-up pants) for bedwetting. Especially where children are involved. They might be self conscious about other products, but the Kylie® Bed Pad can be placed over the sheets, is comfortable to sleep on and offers excellent incontinence protection.

For parents, Kylie® pads can be very useful, as if the pad is wet during the night it can be removed and replaced with another. This causes minimum disruption and lets your child get back to sleep as soon as possible.

Kylie® Sheets in Care Homes

Talk to almost any nurse or carer in a care home and they will tell you that they use washable bed protection on the beds of their residents. Again, the care staff are often busy and using washable absorbent bed pads will save them a lot of time.

The costs are also controlled as you can wash the Kylie® bed pad in a washing machine at 95°C at least 300 times. Compare that to the cost of disposable pads and you will see a clear cost saving. Not only that but disposable pads don't offer the same level of absorbency as a Kylie® pad. The most absorbent Kylie® contains up to 5 litres of liquid, far more than any disposable pad.

Key Features

- Soft but absorbent front sheet
- Waterproof backing
- Can be used on a bed or other soft furnishings
- Washable up to 300 times

- Available in 5 sizes
- Generous mattress tucks on each side (50 cm)
- 1 Pad Per Pack

Washing Instructions

- Washable at up to 95°C
- Tumble dry on a low to medium heat
- Do not use bleach
- Do not use fabric conditioner
- Do not dry clean

Kylie® Bed Pads are softer and more absorbent after the first wash

Size Guide

If you plan to use a Kylie® on a hospital bed, the dimensions are approximately the same as a single bed

A junior bed is a toddler size bed such as a cot bed.
