

New! Dermatologically tested and paraben free

TENA Wet Wash Glove

Caring and convenient full-body cleansing, without soap and water

Full body cleansing is an important part of daily care routines. The new TENA Wet Wash Glove enables a comfortable and convenient cleansing procedure for the individual. The glove is impregnated with a non-rinse cleansing lotion for a caring full body wash with significant advantages over washing routines with soap and water.

Product	Article Number	Total Packaging
TENA Wet Wash Glove	1024	240 (30 x 8)

More comfortable for individuals

- Washing with a non-rinse cleanser is more comfortable for individuals versus washing with soap and water.¹
- Non-rinse cleansing is associated with less skin dryness, irritation and itchiness versus washing with soap and water.¹
- Non-rinse cleansing for individuals with spasms, pain and mobility impairment leads to less pain for the individual.³

More convenient – saving time and costs

- On a typical morning shift in a long-term care ward, 2-4 hours could be saved if washing individuals with a non-rinse cleanser was introduced versus washing with soap and water.²
- Washing with a non-rinse cleanser considerably reduces preparation and clearing-up time.^{1,2}

25% better working postures for care givers.¹

38% of the time spent on every full body wash* is freed up for more rewarding care.²

For the User: More comfortable and less tiring for individuals. More gentle on the skin than soap and water.

For the Carer: Lower workload and less physical strain for carers. More time for providing rewarding care.

For the Purchaser: Improve care efficiencies and help manage infection control.
